

# Panchayat Grievance Register & Resolution Tracker

A simple way for a panchayat office to record every complaint,  
see what is still waiting, and act on the oldest cases first.

NAME : MYTHREYEE.S

DEPARTMENT : BTECH AI&DS

# The Problem

Complaints about a blocked drain, a broken street light, or a damaged road are written in a register or on loose slips at the panchayat office.

## Villagers

Return again and again just to ask what happened to their complaint.

## The panchayat clerk

Cannot say how many complaints are open or which have waited longest.

## The panchayat secretary

Cannot show what was done, or which department is falling behind.

*The information exists - it is simply not in a form anyone can act on or be held to.*

# Our Solution, in One Sentence

**A single online register where every complaint is logged against the right department, stays visible until it is closed, and is shown to the clerk with the oldest, still-waiting complaints at the very top.**

It also gives the clerk an early flag for complaints that look likely to be delayed, so those can be prioritised before they become a repeat complaint.

# Recording a Grievance

The ward clerk fills a short form. Every field is checked on the server before it is saved.

## Panchayat Grievance Register & Resolution Tracker

Every grievance, tracked until it is closed - oldest unresolved cases first.

### Record a New Grievance

Complainant name

Ramesh K

Ward (1-15)

5

Category

Drainage

Description

Drain is blocked and water is stagnant near the houses

Record Grievance

# The Register: Search, Filter, Oldest First

| G0027 | Selvam N    | 1    | Sanitation      | Sanitation Dept | Open   | 186                       | Uncertain  |
| G0001 | Priya R     | 12   | Street Light    | Electrical Dept | Open   | 184                       | Uncertain  |
| G0022 | Priya N     | 15   | Public Property | General Admin   | Open   | 176                       | Uncertain  |
| G0045 | Prakash P   | 3    | Street Light    | Electrical Dept | Open   | 173                       | Uncertain  |
| G0032 | Kavitha V   | 12   | Street Light    | Electrical Dept | Open   | 171                       | Uncertain  |

## How the waiting time is calculated

Open / In Progress cases: days waiting = today's date – date the grievance was raised.

Resolved cases: days to resolve = the date it was closed – the date it was raised.

The list is sorted so open cases come first, oldest date first - the oldest unresolved complaint is always at the top.

# What Works Today, What Is Unfinished

## Working

- Recording a grievance end to end, with server-side validation
- Searching, filtering and ordering the register by urgency
- A simple risk-of-delay prediction shown at creation time
- Loading, empty and error states on every screen

## Not yet finished

- Updating a grievance's status (Open → In Progress → Resolved) has to be done directly in the database — there is no button on the screen for the clerk to change it themselves yet.
- Filtering by category and department is supported by the backend, but the screen currently only has a filter dropdown for status.
- The prediction model was trained on a small seeded dataset (~26 resolved cases), so its accuracy is limited — it is a working demo, not a production-ready model.

# One Improvement We Would Make Next

*Add a button on each grievance row so the clerk can update its status directly from the screen (e.g. mark it "In Progress" or "Resolved"), instead of needing direct database access. This is the most obviously missing piece of daily-use functionality, and would make the register usable end-to-end by a non-technical clerk.*
